ENHANCED ACCESS TO GREATER LEARNING EXPERIENCES

## RADIO PROGRESS!

Radio content has been made and it is in the process of being edited. These radio lessons are meant to reach out more learners who are able to have access to the radio. Ndebele, Agriculture and bible stories were recorded. Our aim is to still teach them to learn how to learn with a Kingdom perspective even through radio broadcasts.

## CONTENT PROGRESS

We continue to create content for our learners and we are expecting more content creators to join the team soon. This will make work a lot more easier and even faster. Our wish is to be able to create content for primary schools as well. On an even higher note we have introduced a new subject that is Commerce. The subject is closely linked to Business and enterprise skills which has seen our BES content creator also working on the Commerce content as well.

*Youth club meeting in Rangemore.*

## Pressing on!

The youth clubs have been progressing very well. The youths have been very keen to learn more about Christ. We watched Christian videos and learnt how God showed his love for us through giving the life of his only son Jesus to save us. They brought up points like, when we sin we hurt God so much because by so doing we show that we do not appreciate his love towards us. We want these young people to be drawn closer to God in every meeting, to be able to relate with each other and also we wish to meet them at their points of need and do our best to assist wherever we can. We have also come to realise that these Youth clubs can give birth to more learning groups. If there happens to be members of the Youth club who want to supplement or even the ones doing their 'O' Level and wish to

## **keller Education**

---

We are still working on making our Keller content more relatable and easier for our facilitators to understand. The team has been working hard towards remaking the videos. the team members watch the Keller videos and say out the important points that they learnt then all that is put together in making the facilitator content. These videos on emotional intelligence have been great eye openers to us as well. We have learnt that some children's behaviours are influenced by the traumas they go through as they grow. A teacher, leader and facilitator should be mindful of what the children they are working are going through so it is encouraged that the facilitator or teacher should make the learning environment a safe and comfortable one so that the learner can have a ,ore calmer behaviour and less aggressive attitude.

---

get extra help that could also be done.

## **We link we learn!**

Ebenezer invited us to 2022 selection camp. A lot of really intriguing activities took place which we as EAGLE could also make use of. We saw how much the Apprentices were learning about God and heard testimonies of his wonderful works in their lives. We also will create a timetable in our learning groups and make sure that our learners get to learn about how awesome God is and learn to appreciate him more. We should be able to help the youths in the Youth clubs to unleash and establish their talent

## **HARDWARE!**

---

NUCS and Hard drives are ready for distribution to at least four sites. One has already been sent to Hope school leaving us with three that we are yet to distribute to our learning groups.
